**MEMORANDUM FOR:**

**SUBJECT:**

Processing of Our Take and Exploitation  
of Operational Data

**REFERENCES:**

Your memorandum, TS# 142952

Your memorandum, TS# 143268

1. In response to referenced memoranda I would like to review the actions on problems noted:

a. Processing of Photograph Data and Arrangements for Exploitation -- Mr. Reber has obtained or is now obtaining from the military the guidance that is necessary to permit Eastman to proceed with its planning for processing and dissemination (i. e., length of film, packaging, etc.). Further refinements of requirements in terms of priorities is now subject of discussion by the Ad Hoc Requirements Committee.

25X1D

b. Processing and Handling of Electronics Data -- The Ad Hoc Committee will be briefed by [REDACTED] on the current planning at its meeting March 27. Thereafter Mr. Reber will summarize for me what plans are firm and what the remaining problems are.

**d. Exploitation of Operational Intelligence for IAC Intelligence**  
**Purposes --** On Thursday, 22 March this Agency, NSA head-  
quarters and NSA Europe held discussions with regard to the  
support for our work. Reber was assigned by me in SAPC 4714  
to head SI matters for the project. [REDACTED] of OCI is monitoring  
the planning with regard to this and during the first week of  
April will be able to hold another discussion with the same  
parties. [REDACTED] is familiar with the discussion and, I  
understand, plans to attend the April 6th meeting. NSA itself  
will want to correlate data which we receive with their own  
data. I believe no arrangements are required at this time for  
[REDACTED]
